PROFESSIONAL SUMMARY

Information Technology undergraduate at SLIIT with hands-on industry experience as an AI/ML Intern at Sri Lanka Telecom PLC, where I worked on Natural Language Processing solutions using PyTorch, TensorFlow, and Python-based ML pipelines. Full-stack engineer experienced across the modern web and mobile stack React and MERN Stack on the frontend; FastAPI, Flask, Spring Boot, and Node.js on the backend; Android (Kotlin / Java) and Flutter (Dart) for mobile. Skilled in Artificial Intelligence & Machine Learning, Data Analysis, Database Management, and Web Application Development. Strong fundamentals in data structures, algorithms, and software design, with a track record of shipping working code and learning new tools quickly. Seeking a role in AI/ML engineering or software development where I can apply both ML and full-stack skills to real world problems.

EXPERIENCE

Artificial Intelligence / Machine Learning Intern

2025 – 2026

Sri Lanka Telecom PLC (SLT) | Colombo, Sri Lanka

- Built and fine-tuned NLP models for telecom text analysis, improving classification performance on real-world datasets.
- Developed speech-to-text processing workflows using Google Cloud Speech-to-Text APIs to convert customer call recordings into structured text for downstream analysis.
- Designed end to end text processing pipelines including tokenization, normalization, vectorization, and embedding generation using Python, pandas, and NumPy.
- Trained, evaluated, and iterated on transformer-based and deep-learning models, benchmarking performance against baseline approaches and tuning hyperparameters to improve accuracy.
- Collaborated with senior engineers during code reviews, model evaluation sessions, and sprint discussions, contributing to production aligned AI/ML workflows.
- Documented experimental setups, model performance metrics, and key technical findings to support cross-team knowledge sharing and project handover.
- Gained hands on exposure to the full ML lifecycle from problem framing and data exploration to model deployment readiness within a large enterprise environment.

EDUCATION

Bachelor of Science (Hons) in Information Technology — Undergraduate

2022 – 2026

Sri Lanka Institute of Information Technology (SLIIT)

Specializing in Information Technology.

G.C.E. Advanced Level

2021

St. Peter's College, Colombo 04

G.C.E. Ordinary Level

2018

St. Peter's College, Colombo 04

PROJECTS

AI-Powered Intelligent Home Planning & Optimization System

IEEE CICN 2026 Conference Paper | Final Year Research Project

[GitHub Repository](#)

- Developed an intelligent home planning platform that combines land analysis, Vastu compliance assessment, and interior and exterior space optimization using Artificial Intelligence techniques.
- Applied YOLO based room detection, machine learning models, and Genetic Algorithms to analyze floor plans and generate optimized design recommendations.
- Evaluated system performance using housing datasets, resulting in the publication and presentation of the research paper at the IEEE International Conference on Computational Intelligence and Communication Networks (CICN 2026).

Telecom Call Intelligence System

[GitHub Repository](#)

- Developed an AI-powered telecom analytics platform for processing and analyzing customer call data to generate actionable business insights.
- Built interactive dashboards and intelligent reporting features to support data-driven decision-making and enhance customer service operations.

SkillDash – Service Facilitating System

[GitHub Repository](#)

- Developed a full-stack web application designed to connect customers with skilled service providers.
- Streamlined job posting, service offering, communication, and feedback management through a user-friendly platform.

Smart Bill Extractor

[GitHub Repository](#)

- Developed an AI-powered bill extraction system for mobile and web platforms using Flutter and FastAPI.
- Integrated Google Gemini AI to extract structured information from receipt and invoice images.
- Implemented Firebase Firestore for real-time synchronization and centralized data management.

CERTIFICATIONS

AI/ML Engineer Program – Stage 1 & Stage 2 — Centre for Open and Distance Education (CODE), Faculty of Computing, SLIIT (2026)

Pearson Assured Diploma in Information Technology (International) — ESOF Metro Campus, Sri Lanka

Diploma in English — ESOF Metro Campus, Sri Lanka

TECHNICAL SKILLS

Programming Languages	Python, Java, JavaScript, Kotlin, SQL, C
Artificial Intelligence & Machine Learning	PyTorch, TensorFlow/Keras, Scikit-learn, Natural Language Processing (NLP), Deep Learning, Machine Learning, Data Preprocessing, Model Fine-tuning, Feature Engineering
Backend Development	FastAPI, Flask, Spring Boot, Node.js, REST APIs
Frontend Development	React.js, HTML5, CSS3, JavaScript, Bootstrap
Mobile Development	Android Development (Kotlin), Flutter (Dart)
Databases	MySQL, MongoDB, Firebase Firestore, SQLite
Tools & Technologies	Git, GitHub, VS Code, Android Studio, Postman, Jupyter Notebook, Google Colab
Software Engineering Concepts	Object-Oriented Programming (OOP), Data Structures & Algorithms, Database Design, Software Development Life Cycle (SDLC), API Development, Agile Development

Areas of Interest	Artificial Intelligence, Machine Learning, Generative AI, Data Analytics, Cloud Computing, Software Engineering, Mobile Application Development
Soft Skills	Problem Solving, Critical Thinking, Communication, Teamwork, Leadership, Adaptability, Quick Learner

EXTRACURRICULAR ACTIVITIES

- Member, SLIIT Faculty of Computing Students Community
- Member, Information Technology Student Community (ITSC)
- Player, St. Peter's College Under-19 Cricket Team
- Player, Sri Lanka Telecom (SLT) Mercantile Cricket Team
